

DEBOJYOTI SAHA

Enterprise AI Engineer | Cloud Engineer | Software Engineer

Bengaluru, India | +91 9007863360 | debojyotisaha26@gmail.com | linkedin.com/in/debojyoti-saha-968724238

PROFESSIONAL SUMMARY

Associate Software Engineer at Accenture with experience in Enterprise AI Engineering, Cloud Engineering, Software Development, and DevOps within the Banking & Financial Services domain. Experienced in designing AI-powered engineering solutions, cloud-native applications, serverless architectures, and developer productivity platforms using Java, Python, AWS, and CI/CD. Built production AI agents for database modernization, repository automation, access workflow automation, and software delivery lifecycle operations while driving measurable productivity improvements.

TECHNICAL SKILLS

Languages: Java, Python

Cloud & Platform: AWS Lambda, AWS Glue, Amazon ECS, Amazon S3, Serverless Computing, Event-Driven Architecture

DevOps: Jenkins, Spinnaker, Bitbucket, Git, CI/CD Pipelines

Testing: Cucumber, Unit Testing, Component Testing, E2E Testing, TestSight

Data Engineering: ETL Pipelines, PostgreSQL Migration, Data Processing

AI & Automation: Generative AI, Agentic AI, Enterprise AI Agents, Multi-Agent Systems, AI Workflow Automation, Prompt Engineering, GitHub Copilot

PROFESSIONAL EXPERIENCE

Accenture | Associate Software Engineer | Dec 2024 – Present

- Developed enterprise applications for a leading global Banking & Financial Services client using Java, Python, AWS, and cloud-native technologies.
- Built and maintained cloud-native solutions leveraging AWS Lambda, AWS Glue, Amazon S3, and Amazon ECS, supporting 15+ Lambda functions and 5 Glue jobs across Development and UAT environments.
- Designed and implemented AWS Lambda functions from scratch and migrated Lambda/Glue workloads from MySQL-compatible implementations to PostgreSQL-compatible architectures.
- Worked extensively with Jenkins, Spinnaker, Bitbucket, Git, and CI/CD automation to streamline software delivery and deployment.
- Designed and developed an AI Database Code Operations & Migration Agent trained on enterprise Spring Boot, ECS, Lambda, and Glue patterns, reducing migration effort while supporting 20+ technology combinations.
- Developed an AI Repository Quality Resolution Agent to automate repository analysis, issue remediation, feature branch creation, and build validation workflows.
- Built an AI Access Request Automation Agent using Playwright to streamline standardized onboarding and project access request workflows.
- Designed and developed the Multi Agent Orchestration System, a production AI engineering solution within a 16-agent enterprise orchestration system, enabling intelligent SDLC automation, repository intelligence, DevOps workflow automation, deployment monitoring, and engineering productivity.
- Led Photon and Python runtime upgrades across 20+ repositories, increased code coverage beyond 80% through unit, component, acceptance, end-to-end, and Cucumber testing, and integrated TestSight reporting.
- Leveraged GitHub Copilot and prompt engineering techniques to accelerate engineering productivity and software delivery.

ACHIEVEMENTS & CERTIFICATIONS

- Team Excellence Award (Jan 2026) for contributions to a high-performance event-driven data processing solution.
- Accenture Learning & Certification Recognition for advanced Google Cloud certifications.
- Manager Recognition for delivering an AI-powered Database Code Operations & Migration solution recognized as an internal AI engineering success story.
- Google Cloud: Professional Cloud DevOps Engineer, Professional Cloud Database Engineer, Associate Cloud Engineer, Associate Data Practitioner, Generative AI Leader, Cloud Digital Leader.
- Databricks: Generative AI Engineer Associate, Data Engineer Associate.
- AWS Certified AI Practitioner.

EDUCATION

Bachelor of Technology, Computer Science & Engineering | Future Institute of Engineering & Management (2024) | CGPA: 9.3+
